## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because the lines, numbers and letters are not uniformly thick and well defined, clean and black (poor line quality) in Figures 1 and 2. In addition, the numbers and reference characters are not plain and legible in Figures 1 and 2. Solid black shading is not permitted in Figures 1 and 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 23-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 23 and in claim 24, the recitation of "it" and "particularly a gas cylinder," respectively, is vague and indefinite. The recitation in claim 25 that the opening of the upstream circuit occurs before the opening of the downstream circuit and the recitation in claim 26 that the closing of the downstream circuit occurs before the closure of the upstream circuit are functional recitations without the requisite structure and/or method steps to carry out the function.

***Allowable Subject Matter***

Claims 14-22 are allowed.

Claims 23 and 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
